LEGAL, FACTUAL AND OTHER INTERNET SITES FOR ATTORNEYS AND LEGAL PROFESSIONALS

By: Timothy L. Coggins∗

INTRODUCTION

[1] This listing of Internet sites for legal, factual, and other research presents a variety of sources for attorneys, law students, law librarians, and others who use the Web. Initially developed for an Advanced Legal Research course and a continuing education session for legal assistants and paralegals, the listing includes sites for primary authorities, both federal and state, as well as URLs for other types of information such as names of possible expert witnesses and biographical and background information about individuals.1

[2] Researchers who want to locate additional sites for legal and other types of research can find Internet sites for attorneys and legal researchers identified in many sources. At the American Bar Association Law Practice Management Section’s annual TECHSHOW, the always popular 60 Sites in 60 Minutes program offers the favorite websites of the attorney and other panel presenters.2 There are many other sites and even print

books that identify relevant, new, useful, and intriguing websites for attorneys and legal researchers.  

[3] Attorneys and others who are generally interested in how attorneys and their office personnel are using technology and the Web today might be interested in the results of an annual survey distributed and compiled by the Legal Technology Resource Center of the American Bar Association. The American Bar Association’s 2008 Legal Technology Survey Report includes explanatory information as well as data presented in chart format in six categories: Baseline and Budgets; Law Office Technology; Litigation and Courtroom Technology; Web and Communication Technology; Online Research; and Mobile Lawyers.

The link - http://www.abanet.org/techshow/60sitesHOF/index.html - connects to an archive of the program panelists’ selections from 2001 through 2008. The 2009 TECHSHOW is scheduled for April 2-4, 2009, and the websites highlighted during the 2009 program will be available shortly at the TECHSHOW page.

The report can be purchased from the American Bar Association, and you can read an executive summary of the report at the following location - http://www.abanet.org/tech/ltrc/survstat.html. The “Online Research” portion of the report covers the use of free and fee-based online legal research resources, as well as information about current awareness, knowledge management, locations where legal research occurs, and much more.
This listing of Internet websites includes eleven sections. Part I covers search engines. Part II identifies some important “comprehensive” or portal websites. Part III includes those websites that can be used to search for legislative and administrative materials, both Federal and state. Part IV covers case law research sites. Part V lists important Virginia legal research and state-specific websites. Part VI is a listing of foreign and international law sites, and Part VII identifies locations for secondary materials. Part VIII identifies websites for people, places, weather, vital records, company information, expert witnesses, and more. Part IX presents some helpful sites for legal and other news, as well as law blogs, wikis, and podcasts. Part X covers sites that are difficult to categorize into one of the earlier nine parts, and the last section, Part XI, is a list of the URLs for the law schools in Virginia, many of which provide legal research guides in the “library” portion of their websites.

I. SEARCH ENGINES

The listing below divides search engines into one of two different types: standard search engines such as Google5 and other types of search engines such as those that search multiple search engines or that categorize or cluster results. There are many sources that compare various search engines and provide helpful charts, which identify how best to search using a particular search engine.6

II. COMPREHENSIVE RESEARCH SITES

[6] Attorneys and legal researchers might be better served by starting their legal and other research by going to a comprehensive or portal research site. These sites are useful because they are good starting places for many different types of information, both primary and secondary. Another advantage of the comprehensive or portal site is its organization. Unlike searching the Web generally, portal sites offer some uniformity and consistency from page to page, allowing the user to develop an understanding of how to locate information using the portal. For example, a person researching at the “Law About …” page of the Cornell Legal Information Institute website will find the same organization for

7 Answers.google no longer accepts questions, but an archive of previously asked questions still remains at the site and is searchable. Approximately 1,850 questions with some answers about “Law” appear in the “Relationship and Society” section of Answers.google.
information regardless of the subject. The page about immigration law is organized similarly in terms of its organization as the page about domestic relations law. In both instances, the researcher finds a section that provides some general background information about the subject, as well as references and links to primary authority, secondary resources, and other sources.

FindLaw: http://www.findlaw.com (Now owned and managed by Thomson-Reuters, formerly Thomson-West.)

LexisOne: http://www.lexisone.com (Free up to a point; then can provide credit card for earlier cases.)

Justia.com: http://www.justia.com (Founded by Tim Stanley, who began and developed Findlaw and subsequently sold it to Thomson-West; provides access to free case law, codes, regulations, legal articles, and legal blog databases; includes a legal research and law practice series in areas such as injury law, criminal law, immigration law, etc.)

Legal Information Institute (Cornell University): http://www.law.cornell.edu (Probably the best of the law school websites; its “Law About …” section is frequently used by legal researchers to discover basic information about a subject matter as well as primary documents such as statutes and regulations.)

Washburn University’s WashLaw: http://www.washlaw.edu

Chicago-Kent College of Law: http://www.kentlaw.edu/

Internet Legal Research Group: http://www.ilrg.com

III. ONLINE SITES FOR LEGISLATIVE & ADMINISTRATIVE MATERIALS

A. FEDERAL LEGISLATION & ADMINISTRATIVE MATERIALS

THOMAS: Access to federal legislation (full text, summaries, status); committee reports; public laws; Congressional Record. Also highlights significant documents such as Omnibus Budget Acts and recent stimulus bills and related documents. http://thomas.loc.gov

USA.gov (formerly FirstGov): Billed as the most comprehensive site (consolidates about 27 million government web pages) to use when you are searching for information about any branch/agency of the Federal Government. http://www.usa.gov/

Regulations.gov: Offers the opportunity to find, review, and submit comments on proposed rules from Federal agencies; designed for lay citizens, not attorneys. http://www.regulations.gov

Federal Register: Coverage includes 1994-present (vol. 59 - present). http://www.gpoaccess.gov/fr/index.html (Current issue of FR also accessible at this site)

Federal Register: Provides access to documents that will be published in the next day’s Federal Register (click on “View Documents Online” button). http://www.federalregister.gov

Metavid: Video archives of congressional floor proceedings on the web, searchable according to who said what; hosted by the University of California at Santa Cruz. http://metavid.ucsc.edu
GPO Access on the Web: Access to government documents including: Budget of the US; Congressional Directory and documents; bills; Congressional Record; Federal Register; History of Bills; Public Laws; Congressional Calendars; US Code; Weekly Compilation of Presidential Documents. http://www.gpoaccess.gov/

GPO’s Federal Digital System (FDsys): Advanced digital system that enables GPO to manage government information in a digital form; included files submitted by Congress and federal agencies; information gathered from federal agencies’ websites; digital files created by scanning previously printed publications. http://www.gpo.gov/fdsys/search/home.action

Federal Legislative History sites: Thomas—http://thomas.loc.gov; University of Michigan—http://www.lib.umich.edu/govdocs/legishis.html. (LexisNexis and Westlaw have databases that provide legislative history documents for those attorneys who have subscriptions. For users searching for legislative history documents at the University of Richmond, the LexisNexis Congressional (CIS legislative histories) database is available. There also is a collection of federal legislative histories available via the HeinOnline service at the University of Richmond.)

GovTrack: Independent website run by a graduate student “in his spare time,” following the status of federal legislation and the activities of senators and representatives. http://www.govtrack.us

OpenCRS Project: Project of the Center for Democracy and Technology designed to provide citizen access to CRS Reports that are already in the public domain and to encourage Congress to provide public access to all CRS Reports. http://opencrs.com

National Archives: National Archives and Records Administration website of important documents. http://www.archives.gov/

IV. CASE LAW SITES

[7] The sites listed below offer access to state and federal court decisions. Researchers might want to begin research with the following when searching for federal court decisions: Emory Law Library Federal Courts Finder, http://www.law.emory.edu/index.php?id=2997/, which links to the Supreme Court decisions and opinions from the district courts and federal courts of appeals when available. Search strategies vary greatly from site to site, but most are searchable by keyword and/or date. Researchers should also look at the websites that are listed in Part I under the comprehensive or portal website listing for additional access to case law.

A. U.S. SUPREME COURT AND OTHER COURTS

U.S. Supreme Court website: Includes information about the Court and the justices, as well as links for the calendar, court rules, dockets, opinions, orders, and other information. Previous volumes of the U.S. Reports at this site are pdfs of the print volumes; therefore, a researcher can easily locate particular volumes and specific page numbers. http://www.supremecourtus.gov

LexisOne: Free up to a certain point; complete coverage of the U.S. Supreme Court opinions, but limited coverage for other courses. http://www.lexisone.com

Fastcase: More inexpensive alternative for accessing state and federal cases; check database coverage. Service is available as a benefit for members of the Virginia State Bar.9 Fastcase is also backing a new

**XII. VIRGINIA LAW SCHOOL WEBSITES**

[8] Most law school libraries maintain research guides. For example, the University of Richmond’s website provides access to a series of research guides dealing with topics such as “federal case law,” “Virginia materials,” “treaties and agreements,” as well as many other topics. These research guides identify both print and electronic resources that might be useful to attorneys and other researchers. Similar research materials might be available at the “Law Library” or “Library” portion of the following websites.

Appalachian School of Law—[http://www.asl.edu/](http://www.asl.edu/)

College of William and Mary School of Law—[http://www.wm.edu/law/](http://www.wm.edu/law/)
CONCLUSION

[9] Although fairly obvious, there are two caveats that must be attached to any listing of this type. First, anyone using the sources identified in any listing of Internet websites must recognize that website URLs change frequently and that websites disappear. If you cannot locate a website using the URL in this listing, merely use the name of the website in Google or another search engine to attempt to locate the current URL for the site. Second, as merely a listing of websites that might be useful to attorneys, law students and others in the legal profession, this article clearly does not deal with the issue of whether or not online searching, print searching, or some combination of the two is the most effective type of legal and other research. Numerous authors have written extensively about that issue.20
