FINDING LEGAL, FACTUAL, AND OTHER INFORMATION IN A DIGITAL WORLD

by Timothy L. Coggins*

I. INTRODUCTION

[1] This updated listing of Internet sites for legal, factual, and other research offers a combination of more established sites and newer sites developed since the publication of the previous listing. The article began as a comprehensive bibliography of research and other sites for an Advanced Legal Research course and a series of continuing education sessions for legal assistants and paralegals.¹ The current version includes sites for primary authorities, both federal and state, as well as URLs for other types of information, such as sites that assist in finding expert witnesses and biographical and background information about individuals.

[2] Researchers seeking to locate more sites for legal or other types of

research can find Internet sites for attorneys and legal researchers identified in many sources. One popular source is the American Bar Association Law Practice Management Section’s annual TECHSHOW in which the popular 60 Sites in 60 Minutes program offers the favorite websites of the attorney and other panel presenters. In addition, many books identify relevant, new, useful, and intriguing websites for attorneys and legal researchers.

Individuals seeking information about the use of technology and the Internet by attorneys or their office personnel for research or other purposes might be interested in the results of an annual survey compiled and distributed by the Legal Technology Resource Center of the American Bar Association. The 2011 American Bar Association Legal Technology Survey Report includes explanatory information and data presented in chart format comprising six categories: Technology Basics; Law Office Technology; Litigation and Courtroom Technology; Web and Communication Technology; Online Research; and Mobile Lawyers.

3 See, e.g., ROBERT J. AMBROGI, THE ESSENTIAL GUIDE TO THE BEST (AND WORST) LEGAL SITES ON THE WEB (2d ed. 2004); CAROLE A. LEVITT & MARK E. ROSCH, THE CYBERSLEUTH’S GUIDE TO INTERNET RESEARCH: CONDUCTING EFFECTIVE INVESTIGATIVE & LEGAL RESEARCH ON THE WEB (8th ed. 2007); CAROLE A. LEVITT & MARK E. ROSCH, THE LAWYER’S GUIDE TO FACT FINDING ON THE INTERNET (3d ed. 2006); THE UNITED STATES GOVERNMENT INTERNET DIRECTORY (Shana Hertz Hattis ed., 2012); see also Catherine Sanders Reach & David Whelan, 10 Ways to Stretch Your Research Dollars: How to Get the Facts on a Dime, L. PRAC., March 2009, at 32 (emphasizing ideas for keeping research overhead as low as possible, as well as many helpful and interesting research websites).

This list of Internet websites contains eleven sections. Part II covers search engines. Part III identifies some important “comprehensive” or portal websites. Part IV includes websites that can be used to search for legislative and administrative information, both Federal and state. Part V covers case law and court information sites. Part VI lists important Virginia legal research and state-specific websites. Part VII lists foreign and international law sites and Part VIII identifies locations for secondary materials. Part IX identifies websites for people, places, weather, vital records, company information, expert witnesses, and more. Part X presents some helpful sites for legal and other news, as well as law blogs, wikis, and podcasts. Part XI covers sites that are difficult to categorize into one of the earlier nine parts and the last section, Part XII, is a list of the URLs for the law schools in Virginia, many of which provide legal research guides in the “Library” portion of their websites.

The report can be purchased from the American Bar Association, and you can read an executive summary of the report and/or purchase the report at the aforementioned link. The Legal Technology Resource Center sent the 2011 survey to 12,500 attorneys in the first four categories (Technology Basics; Law Office Technology; Litigation and Courtroom Technology; and Web and Communication Technology) and to 9,800 attorneys in the last two categories – Online Research and Mobile Lawyers. BAR ASS’N., 2011 AMERICAN BAR ASSOCIATION LEGAL TECHNOLOGY SURVEY REPORT (2011), available at http://apps.americanbar.org/abastore/products/books/abstracts/2680106PDFmeth_abs.pdf. The response rate is not significant, frequently only about 10%. See id. The Online Research portion of the report covers the use of free and fee-based online legal research resources, as well as information about current awareness, knowledge management, locations where legal research occurs, preferences regarding fee-based online services, and much more. This article does not cover other very important topics facing attorneys who are using the Internet for various purposes, such as cloud computing and competitive intelligence. See Catherine Sanders Reach, Reach for the Cloud, TRIAL, Jan. 2012, at 38 (offering an interesting discussion of cloud computing); see also Nicole Black, Legal Technology Predictions for 2012, VA. II. SEARCH ENGINES

[5] The lists below divide search engines into two different types: standard search engines like Google and other search engines that search multiple search engines or categorize or cluster results. Many sources compare various search engines and provide helpful charts that identify how to search with a particular search engine.

a. Standard Search Engines

6 Many legal professionals focus on Google’s many other services. Google Scholar’s advanced scholar search option now offers searching of databases of legal opinions and law reviews/journals, making Google an even more effective search engine for attorneys and other legal professionals. See CAROLE A. LEVITT & MARK E. ROSCH, ABA LAW PRACTICE MGMT. Although the comparison feature chart is not currently updated, it does help a novice searcher understand the features of the various search engines. III. COMPREHENSIVE RESEARCH SITES

[6] Attorneys and legal researchers might be better served by starting their legal and other research by accessing a comprehensive or portal research site, rather than simply using a search engine. These sites are good starting places for many different types of information, both primary and secondary. Another advantage of the comprehensive or portal site is its organization. Unlike searching the Web generally, portal sites offer uniformity and consistency from page to page, allowing users to develop an understanding of how to locate information while using the portal. For example, a person researching the Wex Legal Encyclopedia at the Cornell Legal Information Institute website will find the same organization of information regardless of the subject. This means that the page concerning immigration has the same organization – an “Overview” section and tabs for “Resources,” “For Example,” and “In Caselaw” – as the page about domestic relations.

IV. ONLINE SITES FOR LEGISLATIVE & ADMINISTRATIVE INFORMATION

a. Federal Legislation & Administrative Materials

Code of Federal Regulations and the e-CFR:

Department of Justice: Designed to increase openness and transparency in government, utilizing a variety of online tools to share news and other information.
\[\text{http://www.justice.gov}\]

\[\text{http://governmentattic.org}\]

Federal Legislative History sites, The Library of Congress (Thomas): LexisNexis and Westlaw have databases that provide legislative history documents for attorneys who have subscriptions. For users searching for legislative history documents at the University of Richmond, the Congressional – ProQuest Legislative Histories database is available. There also is a collection of federal legislative histories available through the HeinOnline service at the University of Richmond.
\[\text{http://thomas.loc.gov/home/thomas.php}\]

Federal Register: Coverage includes 1994-present (vol. 59 - present) as well as access to the current issue of the Federal Register.
Federal Register: Provides access to documents that will be published in the next day’s Federal Register (click on “View Documents Online” button).  http://www.federalregister.gov

FOI Letter Generator Request: http://www.rcfp.org/foia

GovTrack: Independent website run by a graduate student “in his spare time,” following the status of federal legislation and the activities of senators and representatives.  http://www.govtrack.us

GPO Access on the Web: Access to government documents including: Budget of the US; Congressional Directory and documents; bills; Congressional Record; Federal Register; History of Bills; Public Laws; Congressional Calendars; US Code; Weekly Compilation of Presidential Documents.  Replaced by GPO’s FDsys (see below), which includes most content previously available through GPO Access.  http://www.gpoaccess.gov/

GPO’s Federal Digital System (FDsys): Advanced digital system that enables GPO to manage government information in a digital form. Includes files submitted by Congress and federal agencies; information gathered from federal agencies’ websites; digital files created by scanning previously printed publications.  http://www.gpo.gov/fdsys/search/home.action

Metavid: Video archives of congressional floor proceedings on the web; searchable according to who said what; hosted by the University of California at Santa Cruz.  http://metavid.ucsc.edu
National Archives: National Archives and Records Administration website of important documents.  
http://www.archives.gov/

OpenCRS Project: Project of the Center for Democracy and Technology that was designed to provide citizen access to CRS Reports already in the public domain and to encourage Congress to provide public access to all CRS Reports.  
http://opencrs.com

Regulations.gov: Offers the opportunity to find, review, and submit comments on proposed rules from Federal agencies, and is designed for lay citizens, not attorneys.  
http://www.regulations.gov/#:home

THOMAS: Access to full text, summaries and status of federal legislation. Includes committee reports, public laws, and the Congressional Record. THOMAS also links to legal historical documents and resources about the legislative process.  
http://thomas.loc.gov/home/thomas.php

University of Virginia – Administrative Decisions & Other Actions: Concentrates on providing access to administrative actions other than the CFR and the Federal Register.  
http://www2.lib.virginia.edu/govtinfo/fed_decisions_agency.html

USA.gov (formerly FirstGov): Billed as the most comprehensive site (consolidates about 27 million government web pages) to use when you are searching for information about any branch or agency of the Federal Government.  
http://www.usa.gov/

U.S. Code: Offers access to the U.S.C. with good search flexibility.

Uniform Law Commission (formerly called the National Conference of Commissioners on Uniform State Laws): Develops and provides states with “non-partisan, well-conceived and well-drafted legislation that brings
V. ONLINE SITES FOR CASE LAW AND COURT INFORMATION

[7] The sites listed below offer access to state and federal court decisions. Search strategies vary greatly from site to site, but most are searchable by keyword or date. Researchers should also look at the websites in Part II under the comprehensive or portal website listing for additional access to case law.

a. U.S. Supreme Court and Other Courts

Casemaker: Similar to Fastcase; available to many attorneys through their state bar associations.
http://casemaker.us

CourtListener: Free and competitive real time alert tool for the U.S. judicial system, providing daily information on precedential opinions issued by the thirteen federal circuit courts and the Supreme Court of the United States.
http://courtlistener.com/

Fastcase: Less expensive alternative for accessing state and federal cases; check database coverage. Service is available as a member benefit for attorneys in Virginia who are members of the Virginia State Bar. Fastcase co-sponsors the Public Library of Law, which provides more than fifty years of federal case law, as well as recent state cases from all fifty states. http://www.fastcase.com & http://www.plol.org/pages/search.aspx

XII. VIRGINIA LAW SCHOOL WEBSITES

[9] Most law school libraries maintain research guides. For example, the University of Richmond’s website provides access to a series of research guides dealing with topics such as “federal case law,” “Virginia materials,” “treaties and agreements,” as well as many other topics.26 These research guides identify both print and electronic resources that might be useful to attorneys and other researchers. Similar research materials might be available at the “Law Library” or “Library” portion of the following websites.

Appalachian School of Law: http://www.asl.edu/

[10] There are many caveats for those using this type of listing. First, anyone using the sources identified in any listing of Internet websites must recognize that website URLs change frequently and that websites disappear. If you cannot locate a website using the URL in this listing, merely use the name of the website in Google or another search engine to attempt to locate the current URL for the site.27 Secondly, as merely a listing of websites that might be useful to attorneys, law students, and others in the legal profession, this article clearly does not deal with the issue of whether or not online searching, print searching, or some combination of the two is the most effective type of legal and other research. Numerous authors have written extensively about this issue.28
