ACKNOWLEDGMENTS

Many of the chapters in this volume came out of an academic colloquium on “Ability and Enhancement,” held at the Jepson School of Leadership Studies at the University of Richmond on April 7–8, 2016. The Jepson Colloquium was associated with a year-long Jepson Leadership Forum series called “The Fix: Health, Science, and the Future.” The lecture series investigated overarching questions about human health and well-being, such as the challenges of global health and poverty, genetics and individual decision-making, and the media’s role in public health. The editors are grateful to all the speakers in the Forum series, notably Dr. Wendy Chung, whose lecture, “Is the Future of Medicine in our DNA,” set the stage for two days of paper presentations and discussion. We are also grateful to all participants in the Colloquium, especially to those who submitted final papers for publication in this volume. To round out the coverage of the volume, we solicited papers from several scholars addressing problems of ability and enhancement. We thank them, too, for allowing us to include their work.

Large lectures series and academic colloquia require a great deal of support. Sandra J. Peart, dean of the Jepson School, was behind us from the start to the end, always making sure we had what we needed to include the very best people working in healthcare ethics. We greatly appreciate her intellectual and institutional support. The editors are indebted, as well, to two Jepson School staff members. Shannon Best not only handled all logistics for the Jepson Leadership Forum but also carefully managed every detail of the Colloquium. Moreover, she did so in a way that made

two complicated events work together seamlessly. Elizabeth DeBusk-Maslanka, managing editor for this book series, collected the results of our labors and enabled us to get the ideas into print. Faculty members, including the editors, often need help hitting deadlines, and Elizabeth kept right us on track with direction that was always calm and kind. We are very lucky to have such accomplished individuals working with us at the Jepson School.

Palgrave's Marcus Ballenger served as our editor from proposal to publication. We thank him and all members of the Palgrave team who have supported this series over the years.

Finally, our family members: Esme, Harper, Hartley, Javier, Lori, and Sofia. To us, you are perfect as you are.
